Timofei Arefev

SOFTWARE DEVELOPER

PROFILE

Fourth-year ICT student at NHL Stenden and backend developer with production experience at DTT Multimedia. I build full-stack systems with Laravel, Java and React, and I'm comfortable translating client needs into working software. Looking for a software engineering internship or part-time job.

WORK EXPERIENCE

Sep 2025 – Jan 2026

DTT Multimedia BV

LARAVEL SOFTWARE DEVELOPER

- Shipped 3 client projects to production in the backend team
- Built backend infrastructure with Laravel, PostgreSQL and Docker

EDUCATION

Sep 2023 – Jun 2027

NHL Stenden

ICT INFORMATION TECHNOLOGIES

PROJECTS

● Feb 2026 – Jul 2026

ADRIFT

Role: Developer, Team Coordinator and Scrum Master

Storytelling game built by a 40-person team, in which players navigate the ocean by the stars. Coordinated team planning and decisions, and architected and programmed the core weather and navigation systems.

● Apr 2025 – Jul 2025

AI-POWERED FORM ENHANCEMENT FOR IT HUB

Role: Main Developer, Scrum Master

Redesigned IT Hub's client registration form. An integrated LLM helps businesses clarify their project requests, so IT Hub can match them with the right educational programmes or experts.

● Sep 2024 – Jan 2025

ASSET ADMINISTRATION SHELL

Role: Main Developer, Team Leader

Digital-twin system for Industry 4.0 factory assets. Led the team and built the full stack, from the PLC code on the factory hardware to the Java back-end and web front-end.
